COLLEGE OF BUSINESS
BASIC COURSE INFORMATION**

COURSE TITLE: Government and Aviation

COURSE NUMBER: BAM 410

PREREQUISITE(S): HIS 303

COURSE DESCRIPTION:

This course focuses on the role of the U.S. government in the development and regulation of the aviation industry. Emphasis is placed on comparing the pre-1978 regulated environment with the "deregulated" environment. Conventions, agreements, and acts are examined, including the impact of international bodies, domestic courts, and regulatory agencies.

MAJOR INSTRUCTIONAL GOALS:

- The 1958 Federal Aviation Act
- The 1978 Airline Deregulation Act

A-4 Explain government's role in insuring the safety of individuals involved in flight to include the various levels of government intervention.

B:

Demonstrate effective communication and research skills pertaining to the aviation industry.

Learning Objectives: The student will:

B3-1 Prepare original communications that respond to emotional statements with reasoned logic and facts.

B3-2 Demonstrate the ability to convey clearly orally and in writing information affecting the industry through analysis and research.

GOAL C:

Produce an original work that analyzes an important challenge affecting the aviation industry.

Learning Objectives: The student will:

- C-1 Demonstrate research skills using both manual and automated databases to find complete information surrounding an event or events affecting the aviation industry.
- C-2 Demonstrate knowledge of current literature and events in the field of aviation.
