MSN 7705

Primary Care II: Acute and Chronic Care of Adults

3. Compare and contrast appropriate treatment modalities with consideration of standards of care, research findings, and resources utilization.

4. Utilize teaching and learning principles to assist the adult and the family in the development and implementation of a plan of care.

5. Integrate appropriate theoretical frameworks to provide comprehensive culturally sensitive primary care for adults and their families.

6. Recognize the challenges in adult primary care considering the context of family and culture.

7. Identify legal, moral, and ethical issues when providie t88egs io54.4 (o04 (m)6.)4.4 (ul)2.3 (t (e)4.4 (.)]TJ0 Tc 0 Tv

Each assigned group will make a presentation on selected health conditions. (Assigned topics are listed below). Students can decide how to divide the topics up within their assigned groups. Topics will be presented using Kaltura/ voice over power point. The student will present key information on the topic using a revolving case study format. Each presentation should include the ROS, PE, diagnostic reasoning, differential diagnosis/ rationale, treatment plan and clinical pearls. Relevant educational information and follow-
