

GOAL B:

The student will become familiar with various sampling and instrumentation issues and select the most appropriate ones to address the problem area selected for investigative purposes.

Learning Outcomes: The student will:

- B-1 Describe their proposed sample.
- B-2 Identify the guidelines/criteria to use in selecting an appropriate sample size.
- B-3 Identify a sample of participants who meet the criteria that will provide the information necessary to address the research question.
- B-4 Select and describe the best instrument to be used to collect data to address the research question.

GOAL C:

The student will gain a clearer understanding of the various procedures that may be used in the research process.

Learning Outcomes: The student will:

- C-1 Distinguish between experimental and non-experimental research procedures.
- C-2 Select the appropriate research procedure to use to address the research problem of interest.
- C-3 Define ethical issues in measurement.

GOAL D:

The student will systematically plan for the analysis of data to answer the research question under investigation.

Learning Outcomes: The student will:

Db.o Tc ~~MD~~ 10 ~~BY~~ 2 1 ()Tj0.005

organizational dynamics.

Learning Outcomes: The student will:

E-1 Describe the use of strategic planning for sustainable change and development.

E-2
